COOLBET AND GAN LIMITED
TALLINN, ESTONIA.

Job Application for LATAM Bookmaker

Dear Coolbet and GAN limited Team,

About Me

I am an engineer with a strong background in mathematics, probability, statistics and computer science. I am interested in problems of uncertainty and risk, and building systems that learn effectively from data. My goal is to build cool products that allow me to explore those interests. I am also a creative individual. I love great music and literature (I sing and play guitar). The things that I most value are learning, being challenged and working with talented people.

I also love both sports and competition. I gather often to watch sport events with family and friends, mostly football games, but also endurance sports and the olympics. I cried when Chile won its first Copa America against Argentina. I also dream to finish an Iron Man triathlon someday, since I love endurance sports. As for e-sports, I played League of Legends until recently, and was very familiar with the local Twitch scene (I have friends that became pro-players). I love watching live matches, and often stayed to late hours whenever the world cup was being broadcasted. I stopped playing LoL when I was in university to focus on my studies, but still continued to play less-demanding competitive games.

Why Coolbet?

I just love your culture and product. You encourage people to be themselves, to work hard and be the best, but also have fun and have balance. I would feel at home. Also, your product is amazing to me, since I haven't seen anything like it in the region. I think the job position combines most of the things I love: Dealing with Uncertainty, technology, sports, competition and data. I would be thrilled to join you and help you succeed. Frankly would do it for free just to be a part of it.

Why Me?

I am smart, driven and a team player. I have the skills and knowledge required to face the technical challenges, and the ability to adapt, learn and succeed under any obstacle. I am already in love with the product, and I think that my experience with the local sport scene can be of value. I you consider me, be sure that I consider the possibility of working with you a once-in-a-lifetime opportunity, and I will give my best to help you grow.

Sincerely,

Adolfo Villalobos
